DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-55, drawn to an apparatus, classified in class 606, subclass 80.
- II. Claims 56-62, drawn to a method of use, classified in class 606, subclass 80.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case invention I is not limited to use in a bone as invention II is due to the recitation of bone in part (d) of claim 56. Invention I applies also to drill bits for tasks as simple as drilling into a piece of wood.

Because these inventions are distinct for the reasons given above and the search required for **Group I** is not required for **Group II**, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
